RE: CPARB – Project Review Committee (PRC)
Letter of Interest for Specialty Contractor Seat

Dear Talia:

My name is Bryan Eppler and I am currently the Director of Strategic Development for University Mechanical Contractors, Inc. (UMC), a privately held firm, of which I am a partner. Please accept this Letter of Interest for the seat of Specialty Contractor for the PRC.

With 25 years of experience bidding, proposing, subcontracting and constructing GCCM, MCCM, and DB projects, I believe I can bring a responsible and realistic specialty contractor perspective to the PRC. My experience ranges from UW Bothell / Cascadia Community College (Phase 1), Seattle-Tacoma International Airport's (STIA) Concourse A and South Arrivals Hall (STEP), to Sound Transit's U-250 Transit Station at UW (U-Link), and more recently the pursuit of the International Arrivals Facility (IAF) at STIA. UMC is a design-build contractor where I've had the opportunity to provide design consultation, constructability reviews, and conceptual budgeting to provide best fit solutions for clients. UMC has proposed and worked on various projects under 39.10: Design-Build projects such as the (IAF) and WASDOT Traffic Management Control Center and more. Additionally, I sit on the Board of Education for the Mechanical Contractors Association of Western Washington and the Board Trustees for the Association of General Contractor Education Foundation. I believe this too gives me additional insight into contracting community at large as related to the Washington State public works contracting processes.

My Contact Information:
