Subject: Director's Report Cover Letter
Governor's Executive Order 12-06

The Washington State Department of Transportation's (WSDOT) core mission is to keep people and business moving by operating and improving the state's transportation systems vital to our taxpayers and communities. Our employees support this mission through the implementation of practical and innovative sustainable measures that directly support WSDOT's mission – while reducing costs and environmental impacts. EO 12-06 affirms WSDOT's sustainable business practices.

For many years, WSDOT has routinely identified and replaced building components and equipment to reduce energy costs and improve energy efficiencies – when practicable. For reference, WSDOT manages about 3.8 million square feet of buildings and structures across the state. Of this, about 3.2 million square feet is owned. It is important to note that as a majority of WSDOT building structures are 26 to 50 years old – or older – it is challenging to meet current energy code requirements without reconstructing entire buildings or without replacement of major building systems and equipment.

Since 2010, WSDOT has been a leader in implementing new state law requiring identification of, and improvements in, the energy efficiency of state buildings (RCW Chapter 19.27A.190). This specific work includes:

- August 2010: Completed benchmarking of 179 Reporting Public Facilities (RPFs) in Environmental Protection Agency's (EPA) Portfolio Manager (PM)
- August 2011: Completed preliminary audits on 4 RPFs with a National Energy Performance Rating (NEPR) less than 50
- March 2012: WSDOT established criteria to determine a list of an additional 61 RPFs (ineligible for NEPR rating) upon which to conduct preliminary audits. WSDOT obtained Department of Enterprise Services (DES) concurrence and approval on methodology to evaluate these buildings for which there was no established national benchmarking.
- May 2012: Conducted investment grade audits on 44 RPFs that met WSDOT's established cost-effective criteria
- November 2012: Completed investment grade audits, well ahead of RCW 19.27A established deadlines. WSDOT is currently evaluating data to determine next steps.

Augmenting RCW 19.27A.190 efforts, WSDOT has conducted energy audits at over 50 additional sites which include more than 180 buildings.

With proactive implementation of energy efficiency requirements identified in state law and EO 12-06, WSDOT will continue to seek energy efficiencies in our state buildings, where practicable, within the constraints of identified funding sources. We will continue toward this goal by implementing cost-effective energy projects and the focused benchmarking of key facilities as outlined in our Executive Order 12-06 Report. As requested, attached are the EO 12-06 Report and Distribution Checklist.

Please contact Yvonne Medina, Facilities Administrator, at (360) 705-7890 if you have any questions or concerns regarding our report.

Sincerely,

Paula J. Hammond, P.E.
Secretary of Transportation

Executive Order 12-06 Report

ACHIEVING ENERGY EFFICIENCY IN STATE BUILDINGS

December 2012

Agency Name:	**Department of Transportation**
Agency Point of Contact:	**Yvonne Medina**
Point of Contact Title:	**Facilities Administrator**
Telephone Number:	**360.705.7890**
E-mail Address:	**medinay@wsdot.wa.gov**

Describe benchmarking, metering, audits, and energy retrofits completed by the agency in 2012 to meet the requirements of EO 12-06:

In 2010, WSDOT implemented RCW 19.27A.190 and benchmarked 179 buildings in EPA's Portfolio Manager (PM) meeting the definition of a Reporting Public Facility (RPF). In 2011, WSDOT conducted preliminary audits on 4 specific RPFs that scored less than 50. In early 2012, WSDOT worked with the Department of Enterprise Services (DES) to determine a list of an additional 61 RPFs upon which to conduct preliminary audits.

Based upon those preliminary audits, 44 RPFs met WSDOT's established cost-effective criteria to proceed with investment grade audits. As of November 2012, WSDOT has completed investment grade audits, ahead of RCW 19.27A established deadlines, and is currently evaluating data to determine next steps.

Augmenting RCW 19.27A.190 efforts, WSDOT has conducted energy audits at over 40 sites which include more than 180 non-RPF buildings. Where practicable, we have completed cost-effective energy savings measures and completed projects to improve lighting and HVAC systems.

Describe benchmarking, metering, audits, and energy retrofits that the agency plans to implement in 2013 to meet the requirements of EO 12-06:

Toward meeting the requirements of EO 12-06, WSDOT will continue to benchmark select key facilities that represent the agency's large facilities where focused benchmarking and energy use analysis will provide a measurable, sustainable and practical benefit. The data in PM will be analyzed to look at site-wide energy use at

these larger sites with focused efforts on particular buildings. Facilities identified for this effort include all regional headquarters facilities, larger area maintenance facilities, large ferry terminals and select sites/buildings with extraordinary energy use (such as some mountain pass facilities).

Describe how the agency used Energy Star Portfolio Manager benchmarking in lease negotiations for new or renewed leases in 2012:

In 2012: WSDOT has not had to negotiate new leases or renew leases that were subject to benchmarking requirements.

Describe actions that will be taken to save energy through operational changes and continuous monitoring using Portfolio Manager:

Both external and internal opportunities, such as the Washington State University (WSU) Extension Energy Program Plant Operations Support Consortium's annual conference, and WSDOT's statewide Facility Manager's Quarterly meetings provide forums for the agency to educate regional facility managers and key staff about energy use and operational efficiencies specific to buildings. Conducting Energy preliminary and investment grade audits of buildings and implementing measures will provide context on performance measures. Benchmarking of specific key facilities in WSDOT's portfolio will enable focused evaluations by statewide and regional staff to monitor and evaluate energy use trends and tracking of expenditures through quarterly reporting. This data can then be evaluated in the context of: business operations, occupant uses, seasonal impacts and building age and/or conditions.
