Dear Chair Zahn and Ms. Baker,

The Northshore School District received your letter dated October 19 concerning its pending appeal. This letter confirms that the School District does not request that CPARB conduct a public hearing of its appeal pursuant to CPARB's Bylaws.

Based on the above, the School District understands that CPARB will consider the concerns raised in District's appeal with deliberate speed as ordinary Board business. The School District initiated the appeal to raise with CPARB what it believes was a serious misstep in the PRC's consideration of its Application for Certification and to request that CPARB address its concerns in the interest of preserving the integrity of the Alternative Public Works framework. The School District very much appreciates that CPARB has taken its concerns seriously and that CPARB intends to address the issues outlined in the District's appeal through future Board action.

Please do not hesitate to contact me if you have any questions regarding this letter. Otherwise, the School District looks forward to focusing on many successful Alternative Public Works projects in the future. Thank you again for your consideration.

Best regards,

Michael F. Tolley
