Re: Project No. 2024-826 On-Call Campus Architects for North Seattle College, Seattle Central College and South Seattle College

Dear Selection Committee,

McGranahan Architects has had the privilege of serving DES and the Seattle College District along with numerous WA State Community & Technical Colleges over many years. We are committed to continuing that support and success through this On-Call Agreement.

We have followed with great interest the growth and development of North Seattle College, Seattle Central College, and South Seattle College, as the largest community college district in the state, resulting in unique and diverse needs for facility repairs and improvements at each campus. In addition, we see an opportunity to promote our shared values-noting the Seattle District's commitment to equity, inclusion and diversity, as well as working together to fulfill a common vision of creating exemplary learning environments.

We are confident that our history of close collaboration with DES will translate into successful project results on the North, South, and Central Seattle campuses. While reviewing our qualifications, please consider the following:

- Over our 55-year firm history McGranahan Architects has served as on-call architects for 10 Community & Technical Colleges. Our project delivery is based on **rapid, nimble response to a wide variety of assignments and delivery methods** — from PRR's and feasibility studies to repairs and renovations. We focus on assigning the right personnel to the right projects.
- We take a **holistic approach to design and project delivery**, bringing together specific program and stakeholders and facilitating buy-in, while maintaining schedule and budget. Effective project scheduling and prioritizing life-safety, maintenance & operations are all fundamental elements of our approach.
- We use senior-led project teams with **firm leaders serving as your primary contacts**, with consistent engagement by our Principal-in-Charge, assuring personal attention and thoughtful exploration with our most knowledgeable talent. The project team identified in this Statement of Qualifications has the capacity to perform the work relative to their existing workload.

This contract will be managed and administered out of our sole office located in Tacoma, Washington. This office will also develop the deliverables for assigned projects including design and construction documents. We have a long history of successfully working with DES to meet MWBE goals and have established relationships with a number of MWBE firms.

We are very excited about this opportunity to continue our firm's relationship with South Seattle College and build on that partnership to include North Seattle College and Seattle Central College. If you have any questions about our firm, our services, or this statement of qualifications please contact me.

Sincerely,

McGranahan Architects

Andy Hartung, AIA, Assoc DBIA, Principal

Matt Lane, AIA, DBIA, LEED AP, Principal

# EXECUTIVE SUMMARY AND KEY TEAM MEMBERS

## Building Relationships

We pursue projects and relationships founded on mutual respect and enjoyment, rigor, collaboration, and professionalism. To best serve our client’s needs, we work with our builder partners to implement and improve best practices, achieving the highest value possible. Sharing our body of knowledge among all parties ensures the whole is greater than the sum of its parts.

**Our goal is to serve as a trusted advisor** to all of our clients. McGranahan Architects is experienced and highly capable of providing the full range of architectural services that are required of your on-call campus architect.

## Balanced Project Approach

Our approach focuses on diligent management, collaborative teamwork, and thorough documentation to ensure your projects achieve your unique goals, schedules and budgets. We make on-call projects successful by using these key guidelines:

**Provide leadership, expectations and updates** – On-call projects require a high level of management, attention to detail, and effective communication. Project timelines are often quick and investigations, documentation, and bidding can occur inside of a few weeks.

**Use an integrated team approach** – To meet deadlines we proactively collaborate with facilities and procurement personnel and work closely with consultants to coordinate design documents that meet the client’s needs and expectations. We have the experience to know what questions to ask, what level of site/building investigations are needed, how to build the proper team to meet project requirements, and how to work with contractors during construction through project closeout.

**Schedule everything** – We know how to develop effective construction sequencing strategies and schedules; clearly

communicate sequencing plans and critical schedule dates to the team and then to contractors through bid documents; and effectively manage the project to maximize the return on investment and minimize any operational impacts.

## Depth of Experience

To support the success of your on-call projects, we bring a deep background of project request reports, facility master planning, understanding client goals, campus cultures, community connections and a commitment to environmental stewardship in service of short and long-range facility goals. McGranahan has broad experience delivering successful on-call projects for community & technical colleges, universities and school districts.

**600+**

## Trusted Advisor

McGranahan values our role as trusted advisors to our clients. We seek to immerse ourselves in our clients' vision and values to better assist them in achieving their facility-related goals. We take a very collaborative, team approach in providing our services, ensuring that we have the right individual with the right skills working on each aspect of the project.

In house, we manage staffing needs for each project to ensure that each team gets the support and expertise necessary to ensure a project's success.

## Key Personnel Roles and Responsibilities

Principal in Charge **Andy Hartung** will provide insights, observations, and oversight for each project and the overall contract. He will be your main point of contact and his interaction will be with team leadership including campus executives and DES project management. Andy will uphold the expectations of our partnership, resources and standards of communication to facilitate effective project development with each assignment.

Additional key McGranahan team members will include **Matt Lane** as Principal / Project Manager, **Kate Frisbie** as Project Manager / Architect, **Seong Shin** as Interior Designer, **Dennis Adjetey** as an Architectural Associate / Engagement Specialist and **Dustin Schaefer** as Architectural Associate. These individuals have completed numerous projects for Community Colleges including South Seattle.

For each project these individuals will work with other design and construction specialists to translate the goals and program needs into cohesive project documents. Specifically, they will lead design concept development, innovation and refinement; manage the work plan; and be responsible for the technical resolve, as well as the coordination of documents with our design consultants. This team is also supported by 30 members of our staff that have experience with on-call work.

## Team Diversity and Inclusion Strategy

McGranahan is committed to inclusion, ongoing learning and long-term transformation. We understand there is always room for improvement, and we strive to be inclusive, open, and willing to have difficult and constructive conversations.

### Firm Personnel Dynamics

We know that diverse talent brings diverse viewpoints. Our goal is a workplace where all employees feel valued; safe from discrimination, intimidation, and bias; and have equal paths to advancement.

### Consultants and Outreach

Our team recognizes how partnering with local minority, women, veteran-owned firms, and small businesses is critical to reducing the disparities within our industry. Our approach starts with determining disciplines and firms that would be the best fit for each project. As we build our project team, we will look for opportunities to divide elements of the scope of work beyond the traditional disciplines. This might include isolating aspects of the planning process, specifications, construction administration, document development, testing, and others. This approach also includes opportunities within each discipline for mentorship, professional development of staff, and inclusion of partner firms.

**Andy Hartung, AIA, Assoc. DBIA, Principal, Project Manager**

**17 YEARS AT McGRANAHAN | 22 YEARS IN THE INDUSTRY**

Andy brings a wealth of Project Management experience for DES supported community and technical colleges including working with Seattle Colleges. Andy will apply this experience with various project types to other client agencies providing clear communication, efficient document coordination and comprehensive management.

#### Education and Affiliations

Bachelor of Science, Interior Architecture  
San Jose State University

# APPROACH

Our approach focuses on diligent management, collaborative teamwork, and thorough documentation to ensure each project achieves its unique goals, aligning scope and budget and maintaining overall project schedule.

## Inclusive, Specialized & Responsive Services

Our firm was built on the foundation of providing our clients with well-managed projects. Methodical document control, proactive scheduling and budget management have been the historical hallmarks of our practice.

## Approach to On-Call Projects

The success of each on-call project will depend on a project process that focuses on effective communication and an understanding of your approach to inclusive campus culture and collaboration.

We are experienced in assessing building systems and developing solutions that gain the most benefit without exceeding the available resources. We will take into consideration not only the existing conditions but also the current standards, code provisions and the impact of the proposed improvements on the rest of the existing facility.

## Understanding the Scope of Services

McGranahan Architects has worked with a variety of community colleges over the years, and are aware that each project may have differing requirements, review processes and code mandates. We understand the scarcity of state capital funding and the importance of maximizing the return on the investment of limited design and construction funds.

We will extend the same level of service on these on-call projects as we would on a major capital project. We understand our role as the on-call Architect needs to be an advocate for the client and an active and trusted member of the team.

The majority of on-call projects have very limited budgets and short schedules. The nature of this works includes:

- Comprehensive architectural and interior design services
- Project Request Reports
- Facility programming and budgeting
- OFM Predesign Reports
- Facility (systems) evaluation and life-cycle costing
- Campus master planning
- Multi-discipline project management and coordination
- Project tracking and schedule management
- Minor improvement projects such as roof and envelope repair/replacements, HVAC repairs/upgrades, electrical upgrades, interior renovations, and ADA upgrades
- Support and budgeting for the Facility Condition Assessment
- Other miscellaneous improvement projects

We will bring a well honed rigor and efficiency to the projects to meet your scope, schedule and budget parameters.

## Details of On-Call Project Implementation

Whether a planned project or emergency conditions, we work through the same comprehensive process. We are thoughtful advisors, strong advocates, and we provide a high level of service with frequent project updates.

### Communication - Leadership, Expectations and Updates

Technical project information needs to flow to the right people in a timely and accountable way in order to maximize efficiencies in design and construction.

Our process establishes key project goals and decision-making milestones, and ensures they are achieved in an effective and enjoyable manner. We are consistently engaged with the team keeping everyone updated regarding the status and key issues of each project.

### Schedule Everything

We prepare an overall schedule and submit it along with our fee proposal at the outset of each project. Then we develop a detailed weekly schedule, coordinate key meeting and milestone dates with the College and DES, and re-confirm it during each phase to ensure it is maintained.

Proactive scheduling is particularly important in coordinating subconsultant work, jurisdictional permitting timelines, and the State’s project approval process. Our clients know us as strong schedule managers and we are consistently dependable in meeting deadlines.

### Define the Project - Align Scope and Budget

Our team will review project details, goals, budget, and schedule with the DES Project Manager and College. We will establish a communication plan and identify appropriate team members and specialty consultants that align with the project needs.

We then gather and review available as-builts or studies, visit the site, and document existing conditions. We will take into consideration not only the existing conditions but also current College standards, code provisions and the impact of the proposed improvements on the rest of existing facility and any adjacent services.

Highline College On-Call Project Schedule Diagram

### Quality Control and Document Review

Our team will work closely with the College to determine that each project meets its defined scope within budget. We will build document review opportunity into the project schedule and utilize a proactive QA/QC process.

The team also places emphasis on quality within each phase including scoping, design, construction and transition to occupancy. Our process includes formal issue tracking and quality control review procedures which minimize our document-related change orders that historically averages less than 1% of construction costs.

### Bidding and Construction

We will coordinate all bidding processes with DES requirements for public bidding and/or JOC contracting, and represent the best interests of the College throughout construction.

Every construction project is unique and presents its own challenges. Effective construction administration requires a person with experience, technical knowledge, and good communication tools. Our close integration of the drawings and specifications ensures a high quality, finished result.

# RELEVANT EXPERIENCE

## Experience as On-Call Architect

McGranahan has a great amount of previous experience providing On-Call Architectural and planning services. This includes master planning, Project Request Reports, project scoping and feasibility studies, minor repairs and improvements, and major renovations. The role requires availability and quick action to projects presented, no matter the scale or scope. Through our experiences we bring a comprehensive background to the Seattle Colleges On-Call Architect Agreement. The table below highlights our depth of experience with on-call work.

	Highline College	Pierce College, Fort Steilacoom	Pierce College, Puyallup	Tacoma Community College	South Seattle College	Shoreline Community College	Renton Technical College	Lake Washington Institute of Technology	Cascadia College	South Puget Sound Community College	Olympic College	Bates Technical College	Clover Park Technical College	Lower Columbia College	University of Washington

Relevant Experience with Local On-Call Projects Table

## Feasibility Evaluations

McGranahan has produced evaluations/studies that break down site potential, building and planning codes, building arrangement, program adjacencies, potential schedule delivery and phasing, as well as rough order of magnitude estimates that aid in building budgets. These feasibility studies provide conceptual programmatic planning that help move projects forward into design. Our recent feasibility examples include:

- South Seattle College, Wellness Center
- Highline College Building 24A Maintenance & Grounds
- Highline College Buildings 1, 3, 6, & 12 Scoping Study
- Shoreline College Building 1700 Renovation Study
- Pierce College Restroom Study
- Pierce College Parking Study
- Clover Park Technical College Building 14 Assessment
- Bates Technical College PCTV Study
- Olympic College PE Building Study
- University of Washington Tacoma Milgard Hall Site Study
- Saint Martin's University Old Main Feasibility Study
- Remann Hall I & J Wing Addition & Remodel Study

### Feasibility and Renovation Example

#### Highline College, Building 24A

Building 24A was envisioned for a remodel and addition to relocate the maintenance department from building 26 to the same site as grounds maintenance, which would allow for expansion of instructional programs in the vacated space on the first floor of Building 26. The study identified program needs, project scope, and verification of the project MACC.

The feasibility study determined the solution that would meet the needs of the College was a minor renovation of the existing maintenance building, and a new shared pre-engineered structure. McGranahan was selected to provide design and construction document services.

## Universal Design

Universal design makes buildings accessible to all people, regardless of age, disability or other factors. It's not only a legal requirement, it is a moral imperative that our public facilities are designed to be accessible to everyone.

We have a deep understanding of current accessibility codes and how existing facilities can be modified in reasonable ways to best serve people with disabilities. For example, we recently completed comprehensive accessibility upgrades for the University of Washington Bothell/Cascadia campus.

### Interior ADA Barrier Remediations Example

#### University of Washington Bothell and Cascadia College

McGranahan provided a comprehensive Scoping Report, construction documents and construction support for the campus-wide remediation of interior ADA route barriers in accordance with UW Bothell's Voluntary Resolution Agreement with the Office of Civil Rights to improve campus accessibility. The comprehensive Scoping Report located and described all surveyed barriers, including proposed solutions and costs associated with the work. We provided ongoing support through construction, documenting all completed work, and updated the report that will be used as a document to report to the Office of Civil Rights.

### Elevator Replacement Example

#### Highline College, Building 23

This project includes demolition of the existing 3-stop hydraulic elevator and equipment, including the cab, jack, side rails, doors, and controls, wood hoist beam, sump pump, and existing pit slab. We worked with the College to provide a new 3-stop MRL traction elevator with steel hoist beam, tube steel rails, doors, controls, and pit slab. Work also includes mechanical and electrical work to support the new elevator unit, and waterproofing in and around the elevator machine room and elevator pit.

## Tenant Improvement Experience

Tenant improvements, or small renovations, make up a large portion of our On-Call Campus Architect work. Our approach to these small but mighty projects include investigating, evaluating, and clearly defining the scope of work and project extents for each job. We lead a multi-discipline team, when necessary, with a variety of consultants. The project team works together to accurately document existing conditions and create designs to meet the users' requirements.

Our recent relevant tenant improvement experience includes:

- Gender Neutral Restroom Renovation, Pierce College
- Restroom Upgrade, Shoreline Community College
- Learning Commons and Engineering Renovation, University of Washington Tacoma
- CREST Lab Renovation, University of Washington
- Academic Advising Center Remodel, University of Washington
- Cascade Building Plans Room Remodel, Pierce College
- Lecture Hall Renovations, Pierce College Fort Steilcaoom and Puyallup

### Interior Renovation Example

#### Center for International Education, South Seattle College

This project relocated and expanded the International Programs Office. The original space in the Robert Smith Building was approx 1,300 SF. The old Wine making program space was renovated, which is approx 3,200 SF. The program consists of 9 private offices, 6 open workstations, reception, conference room, work room, file storage room, kitchenette and lobby/student gathering/study space. The goal was to provide a space that is more inviting for the international students to hangout, socialize and study. New offices increased privacy for counseling & advising. A new conference room meets their need for testing and meetings and is a campus wide resource.

## Emergency Response

While many of our On-Call projects benefit from a thoughtful, planned approach to execution, the reality is that a significant responsibility of the On-Call Architect is to respond to unforeseen, emergency projects. These projects can potentially disrupt daily activities, productivity or campus operations, or even pose safety issues and the potential for further building damage if not addressed quickly. We are a responsive firm with the surge capacity to staff whatever emergency situation arises and the breadth of experience to quickly provide solutions.

We have frequently addressed roofing and building envelope issues, power and IT failures, building facade failures, and notably, storm surge damage on a waterfront facility.

Envelope Improvements, Capital High School, Olympia School District

### Emergency Project Response Example

#### Building 14 Envelope Repairs/Improvements, Clover Park Technical College

When we received a call from the college saying concrete was spalling off one of their buildings, we immediately sprang into action and provided a solution to this life-safety issue. The college cordoned off the area and we performed an investigation with our structural and envelope consultants.

We quickly produced a scoping report which allowed the college to procure emergency funding, followed by CDs for an expedited repair project.

Water had penetrated the 25-year-old precast soffit panels, causing steel reinforcing to rust and concrete to spall. We removed the panels, replaced the corroded steel with new epoxy-coated reinforcement, and installed new panels with elastomeric coating. We also replaced rotted parapet blocking and roofing membrane with new to prevent any further water intrusion.

## Exterior Renovations

Our team has capacity to perform comprehensive investigative surveys of existing building envelopes, engaging with maintenance staff to understand each building's performance history and challenges. We coordinate with manufacturers and confirm Agency and Building/Energy Code standards for exterior wall and roofing assemblies.

Our experience with roofing projects includes a comprehensive array of roofing systems, including "green" roof assemblies, membrane roof assemblies, built-up roof assemblies, asphalt shingle, standing seam metal panel, and urethane coatings.

We also have technical knowledge and experience replacing, repairing, and assessing exterior wall assemblies to improve weather resistance and energy efficiency. Envelope work often occurs in an occupied structure, and we are experienced in working with clients and contractors to phase work and construct temporary barriers to protect and isolate users from construction.

Our experience is not limited to buildings; we often coordinate/lead teams for site improvements. Recently we completed work designing campus wayfinding signs for Renton Technical College, campus entry and parking lots signs for Highline College and Pierce College, parking lot paving and restriping for Highline College and parking expansion for Pierce College Puyallup.

## Mechanical & Electrical Improvements

Mechanical and electrical improvements are one of the foundational pillars of On-Call work. Older buildings simply cannot be replaced fast enough in the funding process and State Agencies face a continual cycle of maintenance, repair, and upgrade.

Mechanical and electrical improvement projects, along with roof repairs and replacements, make up a significant percentage of our On-Call project portfolio. These projects often need the strongest project management because the budgets are slim and cannot afford escalation, scheduling is essential to minimize disruption in classrooms, and they uncover opportunities for unforeseen conditions to arise.

Mechanical Upgrades & Replacements, South Seattle College

### Cladding and Roof Replacement Case Study

#### Pierce College, Olympic South and Cascade Building

Cascade and Olympic South Buildings were both constructed with marblecrete cladding that failed, and then re-clad with EIFS which also failed. These failures were discovered when fungal growth was found in the exterior wall cavity during an interior renovation. McGranahan completed an assessment of the exterior envelope along with a conceptual design for re-cladding this large structure.

A combination of emergency and minor works funds were used to re-clad the Cascade and Olympic South Buildings in multiple phases covering several biennium. The solution incorporated a modern weather/air barrier with exterior insulation and a rain-screen cladding assembly, resulting in increased mechanical fan efficiency and reduced energy consumption. A similar approach was taken with the roof of the Cascade building. Due to the building size and budget restrictions the roof could not be replaced as a single project.

The initial studies for both the envelopes and roofs allowed the college to plan out the sequence of projects for several biennium for inclusion in their capital budget request and support their building conditions survey completed by SBCTC every two years. We are well aware of the remaining areas of Cascade that still need envelope replacement. Including work on Level 5 that we have produced construction documents which could be updated and bid in the upcoming biennium if funds are available.

## Workplace Design

McGranahan Architects has designed healthy and productive workspaces for a variety of clients and settings, ranging from corporate settings to research and education. Space types and furnishings can empower work and collaboration, especially when the types of work done in each space is more fully understood. We understand how to optimize space allocations, and plan for successful work stations, offices and shared space.

## Project Request Reports (PRRs), Facility Master Plans, and Predesign Experience

McGranahan Architects is highly skilled in developing Project Requests, Master Plans and Predesign Reports. We understand the Office of Financial Management (OFM) approval process, and how to clearly articulate the needs and deficiencies on behalf of agencies to procure State funding. We have also helped colleges bundle Certificate of Participation (COP) and local funds to make projects economically feasible.

When working with community and technical colleges on PRRs, we often start with a feasibility study to assess need and scoring potential. Frequently, this also requires a Master Plan update to evaluate long range campus capital and educational goals, impact on infrastructure, and permitting agency coordination.

We submitted 4 PRRs on SBCTC’s capital request list for the 2021-23 biennium (Tacoma, South Seattle College, Renton and Highline)

We have also provided Predesign, Design, and CA services for most of the projects we assist in procuring funding. We deliver projects through their entire development, and we know how vital a thorough and thoughtful early planning process is to their success.

### Workplace Design

Space types and furnishings can empower work and collaboration, especially when the types of work done in each space is fully understood. McGranahan explores questions of how we work and learn optimizing space allocations, and planing for successful work stations, offices and shared space. The following activity descriptors help inform the design and furniture integration and placement.

**Converse** - a purposeful interaction between 2-3 colleagues who address a defined topic.

**Huddle** - intentional and focused group meeting to discuss and receive instructions for a plan of action.

**Process & Respond** - space to complete action plans, respond to the feedback loop of e-mails, phone calls, and messages, and produce outcomes.

**Contemplate** - an opportunity for an individual to pause and consider the best way forward in their work or ignore it momentarily and provide respite.

Leveraging our contacts with local furniture vendors, we are able to incorporate the information gathered from user groups to assist with furniture and work station selections that maximize the potential for effective, collaborative, and satisfying work environments.

## Sustainability

We help our clients prioritize where to spend limited resources to improve building performance while improving the quality and longevity of their facilities. We understand the importance of meeting the State's energy efficiency goals while minimizing annual operational and maintenance costs without exceeding the project budget.

### For many On-Call projects, sustainability means:

- Achieving the highest long-term return on your investment of limited funds.
- Minimizing the costs of energy, maintenance, and replacement over the life-cycle of a unit of system.
- Ensuring compatibility with facilities planning and client agency/campus standards so facilities can be efficiently maintained.
- Maximizing flexibility of space to be used in a variety of ways.
- Identifying ways to create a more healthy facility.

We have multiple tools that allow us to deliver improved facilities that are beautiful, durable, and efficiently maintained. In the past 10 years, we have achieved 16 LEED Silver, Gold, and Platinum-certified higher ed projects.

### AIA 2030 Commitment

We are signatory to the AIA 2030 Commitment, and twice over the last three years, we have been nationally recognized for leadership and delivering results within that context. We are one of only 27 firms nationally (one of only 4 in the Pacific Northwest) to report that all our submitted 2019 projects met the 2015-2020 goal of 70% reduction of carbon emissions related to building operation.

### LEED Certified Tenant Improvement Case Study

#### Lab I - Science Building Second Floor Renovation, The Evergreen State College

This full floor renovation in the College's Lab I Building included five instrumentation labs required for chemistry, field science, geology, marine science, biology, physics, health science, forensic science, as well as visual arts programs. Spaces include a microbiology, genetics and physics teaching lab; faculty and student research labs, and lab stores. Project priorities included improving flexibility and efficiency of spaces, improving lab safety and creating a healthier, more energy and efficient space that will be more attractive to potential students. The renovation achieved LEED-CI Gold Certification.

*"Their process was collaborative every step of the way from meeting with several design committees consisting of faculty and staff of the college to the weekly construction meetings in which I attended regularly. I always felt that my input was welcome and I appreciate their responsiveness to my questions as they arose."* - Michelle Pope, Visual Arts Operation Manager, TESC

# ARCHITECT- ENGINEER QUALIFICATIONS

1. SOLICITATION NUMBER (If any)

Project No. 2024-826

## PART II - GENERAL QUALIFICATIONS

(If a firm has branch offices, complete for each specific branch office seeking work.)

2a. FIRM (OR BRANCH OFFICE) NAME <b>McGRANAHAN</b> architects			3. YEAR ESTABLISHED 2000	4. DUNS NUMBER 087594388
2b. STREET 2111 Pacific Avenue, Suite 100			5. OWNERSHIP	
2c. CITY Tacoma	2d. STATE WA	2e. ZIP CODE 98402	a. TYPE Professional Services Corporation	
6a. POINT OF CONTACT NAME AND TITLE Andy Hartung, AIA, Principal			b. SMALL BUSINESS STATUS	
6b. TELEPHONE NUMBER 253.383.3084		6c. E-MAIL ADDRESS andy.hartung@mcgranahan.com		
8a. FORMER FIRM NAME(S) (If any) McGranahan Partnership			8b. YR. ESTABLISHED 1968	8c. DUNS NUMBER 087594388
7. NAME OF FIRM (If block 2a is a branch office)				

9. EMPLOYEES BY DISCIPLINE				10. PROFILE OF FIRM'S EXPERIENCE AND ANNUAL AVERAGE REVENUE FOR LAST 5 YEARS		
a. Function Code	b. Discipline	c. No. of Employees		a. Profile Code	b. Experience	c. Revenue Index Number (see below)
		(1) FIRM	(2) BRANCH			
				E02	Educational Facilities; Classrooms	7
06	Architect	21		I05	Interior Design; Space Planning	5
48	Project Manager	5*		C11	Community Facilities	5
37	Interior Designer	1		C05	Child Care/Development Facilities	4
56	Specifications Writer	1*		A11	Auditoriums & Theaters	5
02	Administrative	8		F02	Field Houses; Gyms; Stadiums	4
	Architectural Staff	6		R06	Rehabilitation (Bldgs, Structures, Fac.)	5
				P06	Planning (Site, Installation & Project)	4
	* Project Managers and Specification Writers may also be counted as Architects					
	Other Employees					
	<b>Total</b>	36				

11. ANNUAL AVERAGE PROFESSIONAL SERVICES REVENUES OF FIRM FOR LAST 3 YEARS (Insert revenue index number shown at right)		PROFESSIONAL SERVICES REVENUE INDEX NUMBER			
a. Federal Work		1. Less than \$100,000	6. \$2 million to less than \$5 million	7. \$5 million to less than \$10 million	8. \$10 million to less than \$25 million
b. Non-Federal Work	7	2. \$100,000 to less than \$250,000	9. \$25 million to less than \$50 million	10. \$50 million or greater	
c. Total Work	7	3. \$250,000 to less than \$500,000			
		4. \$500,000 to less than \$1 million			
		5. \$1 million to less than \$2 million			

### 12. AUTHORIZED REPRESENTATIVE

The foregoing is a statement of facts.

a. SIGNATURE 	b. DATE August 3, 2023
