To complete an in-depth analysis and gain recommendations on the advantages and disadvantages of consolidating the services of Washington State community and technical colleges within specific geographic regions of the state. The analysis must include recommendations on the feasibility of educational enhancements, cost-savings and other efficiencies that could result from the concentration or consolidation of business, instructional, student services and administrative functions among the colleges or through the merger of college districts.

	Sole Source CZ - Other Services Approved	Start Date: 3/12/2012 End Date: 6/30/2012 Filing Date: 2/27/2012

The purpose of this contract is to access the expert knowledge needed to assist ESIT with establishing new rates for Medicaid-funded early intervention services. ESIT and Emerald Consulting are currently working with the Washington State Health Care Authority (HCA) and the Centers for Medicare and Medicaid Services (CMS) to update the Medicaid State Plan in a manner that explicitly provides coverage for all IDEA Part C early intervention services, recognizes the different types of providers administering these services, and acknowledges that where possible the services be provided in natural environments. With this update, the state is in need of Medicaid billing rates that are aligned with the proposed new Medicaid State Plan language and reflect the actual cost of service provision experienced by providers. This work builds upon the ESIT Cost Study, which found that Medicaid is used inconsistently, if at all, by many early intervention service providers. Those that are able to bill Medicaid for early intervention services expressed that the existing rates do not adequately cover the cost of service provision. This effort is therefore intended to develop a new set of early intervention Medicaid billing rates that reflect the types of services being provided and the costs of providing those services.

Provide technical services for development of a new database and data processing applications specific to the Submerged Vegetation Monitoring Project (SVMP) in the Nearshore Habitat Program. DNR's eelgrass monitoring data is mission-critical to DNR since it is used by multiple programs to measure success of management actions to protect the environment. The Puget Sound Partnership has selected DNR's eelgrass monitoring data as a dashboard indicator to measure success of this major new initiative to protect and restore Puget Sound. It is used by DNR as a performance measure for environmental protection. Additionally, monitoring results are also used in many assessments of environmental condition, including the State of the Sound report and salmon habitat monitoring. The deliverables from this contract will also improve the ability of the SVMP to provide eelgrass survey results to other projects such as DNR's Eelgrass Stressor-Response Project and Aquatic Reserves Program.
