This amendment is related to preventing bodily injury if action is not taken.

It is the purpose of this Contract for the Contractor to provide professional services to conduct ergonomic worksite/job modification evaluations and provide written findings and recommendations for workstations and /or individual Department of Licensing employees.

The original contract was to provide professional services to conduct ergonomic worksite/job modification evaluations and provide written findings and recommendations for workstations and /or individual Department of Licensing employees. DOL needs to amend the current contract with Ergo-Fit for \$2,500.00 to accommodate for additional ergonomic evaluations. We have a remaining balance of \$117.78 to conduct on-site ergonomic evaluations for agency employees at the department's request. This is a core health and safety activity designed to both protect the well-being of agency staff and proactively manage the risk and cost of rising industrial insurance claims from work related injuries.

The DOL did an internal approval process which had all the major stakeholders involved including the final approval authority our agency Deputy Director. Providing ergonomic workplace assessments on "as needed" basis is a "best practice" for proactively managing potential increases in the number and size of industrial insurance claims. DOL does not have an Ergonomoist 3 or 4 to perform this type of evaluations. The consequences of not amending the contract could be long term increases in industrial insurance claims from motion and other workplace injuries.
