The Washington State Military Department Emergency Management Division (EMD), through the Federal Emergency Management Agency (FEMA) State Earthquake Assistance Program, provides support for the Emergency Management Council's Seismic Safety Committee. The Emergency Management Council was established by RCW 38.52.040 and EMD staff provides direct support for this board and its subcommittees, including the Seismic Safety Committee. The Seismic Safety Committee is tasked with providing a framework for improving Washington's resiliency through seismic mitigation policies and recommending legislation and policy changes to improve and enhance statewide seismic safety. To help meet its stated objectives the Seismic Safety Committee has decided to produce a new document regarding the State's resiliency to earthquakes. The final product will be used both by EMD Earthquake Program and Seismic Safety Committee, and Emergency Management Council to facilitate long-term implementation of seismic risk reduction polices across the state. The Contractor will work closely with the Resilient Washington State subcommittee, will provide technical writing and editing services, and will conduct some research to assist in the development of the report.
