The purpose of this contract is to determine the resources required for the care of the State Art Collection, a collection of more than 4,500 artworks located throughout Washington State in K-12 schools, colleges, universities, and state agencies.

The contractor will provide a written report detailing the resources--including costs, staffing, and expertise--needed to care for the State Art Collection given its size, scope, age, and geographic spread. The assessment will be based on an evaluation of collection database records; limited site visits to evaluate artworks; and an evaluation of a limited number of paper records (including existing conservation assessments where available).

The resulting report will be used to advance agency strategic planning and resource allocation, and will be used as the primary source of information for a second assessment phase, focusing on collection policies and management priorities.
