The sponsor has requested a rate increase from \$120 per hour to \$125 per hour for engineering and project management services provided to the Family Forest Fish Passage Program and other special projects. The provision to allow for a rate increase for services provided was written in the RFQQ and allows a rate increase of 5% per year to account for inflation and increased cost of living. The purpose of this contract is to acquire engineering services to develop preliminary fish passage designs and cost estimates for high priority projects. Engineering services may also be needed once the project is funded to assist local sponsors with implementation.

This amendment adds \$24,000 to fund the design and project management for two high priority fish passage projects for the Family Forest Fish Passage Program (FFFPP) and also adds \$15,000 to perform new scope items related to Wiley Slough.

The original purpose of this contract is to provide engineering services to develop preliminary fish passage designs and cost estimates for high priority projects. Engineering services may also be needed once the project is funded to assist local sponsors with implementation. This could potentially cover a number of engineering tasks including, but not limited to, the following: preparing bid documents, final design work, contract negotiations, construction management, construction supervision and inspection, and guidance on challenging projects.
