**Project No. 2016-952
Capitol Campus – Tivoli Fountain Repairs
Department of Enterprise Services (DES); Olympia, WA.**

Scope of Work

This Request for Qualifications (RFQ) seeks to select a team to assess the historic Tivoli Fountain on the Capitol Campus in Olympia, Washington and design necessary repairs. The fountain was originally designed and constructed in 1952. It is a 53 foot diameter concrete basin with two concentric inner concrete basins. The fountain holds 14 lighted rush leaf bundles, each with a jet nozzle, a central water lily bundle with four light fixtures and seven jet nozzles, and an outer spray ring that lifts water in a pleasing umbrella pattern. The fountain has been assessed and repaired periodically over time, but the original piping is due for replacement, the concrete basins are leaking, and all pump, valves, and controls need to be evaluated. Copper architectural features have been repaired and replaced in earlier projects and are not part of this RFQ. The state is pursuing a minimal 25-year life for the repairs undertaken in this project. We intend to minimize water loss while retaining concrete fountain basins in as close to original condition as possible, retaining historic functionality and character while replacing original components, as necessary.

The total allocation is \$450,000.

There will be a **Mandatory Informational Meeting** for this request on:
