LEED®-NC Scorecard

Instructions

The scorecard is used to track your anticipated LEED™ score as your project progresses. The active spreadsheet sums the credit points for each category and provides a total score for the project. Values in the category subtotal and in the project total fields are done automatically.

The prerequisites are code requirements. "Y" (yes) appears adjacent in the first box and the other two are shaded. Beside each credit are three boxes. To score, put the number of points for that credit into the "Y" box, or in the "?" box if it is unsure, or in the "N" (no) box if this credit will not be pursued or is not applicable to the project. The possible points for each credit are shown in the far right column in each category. Energy & Atmosphere Credit 1.1 through 1.5 are each worth **two** points each.

The total number of points listed in the first box of the Total Project Score indicates the current anticipated score of the project. The ranges for each LEED certification category are listed below this row. A minimum of 26 points and achievement of all prerequisites is required to **certify** a project.
