**Describe actions that will be taken to save energy through operational changes and continuous monitoring using Portfolio Manager:**

**OFM continues to maintain best practices put in place over the years to use energy efficient small and large appliances, IT equipment, and lighting. All of our DES owned buildings are in great need of new HVAC systems to further the energy savings needed to reach the goals stated in EO 12-06.**

**If the 1063 Capitol project is funded in 2015 this will allow OFM to move from highly inefficient space in the GA building to a superior high efficiency facility in 2018.**
