

## Project Review Committee Report to CPARB 12/11/14

December 4, 2014 PRC Meeting

CPARB PRC appointments: Newly appointed PRC members present were introduced to the PRC.

Applications Received: The Project Review Committee received 2 applications for review.

1. The application from the Washington State Convention Center Facility Expansion (GC/CM) was requested to be pulled and will be resubmitted at a later date.
2. WSDOT Ferries Division, Coleman Dock Project (GC/CM).  
PRC panel unanimously approved the GCCM application by WSDOT/WSF Division for rebuilding of Seattle's Coleman Dock Project. This is envisioned as a \$268M project overall, currently funded on the order of \$13M for design and preconstruction. WSF has assembled a team of some GCCM-experienced staff plus a GCCM-experienced consulting team including Parametrix, with advisory and mentoring input from current and past UW Alternative Public Works delivery staff. The project is multi-phased, operational during construction, and complex with considerable environmental and infrastructure challenges ahead.

Our next PRC meeting is scheduled for January 22, 2015 with applications due by COB January 2, 2015.

### Other Items:

- When CPARB appoints new and/or replacement PRC members OR a current 'expiring term' PRC member leaves the Committee, a letter of 'thanks/appreciation for your service' is requested to be sent by CPARB notifying/confirming said departure(s). This could be 'pre-formatted' letter with the only missing specifics, the person's name and date(s) involved.
- AGC GCCM training set for January 29-30, 2015. Request CPARB post this information on their web site, with link to the AGC's announcement. Latest data [12/9/14] indicates however that this class is full/sold-out.
