RE: Central Valley School District  
Application for Agency Certification  
GC/CM Delivery Method

Dear Project Review Committee Members,

T.W. Clark Construction has been a General Contractor for the past 22 years, located in Spokane Valley. We have had the opportunity and the pleasure to work with Central Valley School District on GC/CM projects on two projects that are currently under construction; Horizon Middle School and the CVSD HVAC Upgrades. Our time working with CVSD on these projects has been an extremely positive experience.

We are in complete support of Central Valley School District's application to renew their GC/CM Agency Certification. Our support stems from our relationship with CVSD and the reputation that they have built with subcontractors, other general contractors and architects in the area. It is clear the district has the knowledge and tenacity to create great projects that will benefit our community.

Sincerely,

A handwritten signature in blue ink, appearing to read 'SRSQ', with a long, sweeping underline.

Steve Sunleaf
