Application for PRC Owners – Ports Position

CPARB,

I'm pleased to submit my application the seat on the Project Review Committee (PCR) representing Owner, Ports. I have been grateful for the opportunity to sit on the PRC for the past 9 months and assist in this vital work. I have really enjoyed my current time on the PRC. I have decades of experience in construction and have been a part of and led several alternative public work projects (APW). These past 9 months I have gained even more insight into Washington APW process, risks, and best practices. I have been able to utilize what I have learned on PRC at the Port of Seattle and it is my hope that I can leverage the knowledge I have and am gaining to support public owners and business partners.
