Re: Project Review Committee Vacancy – Design Industry Architect

Dear Board Members:

Please consider this my official letter of application for reinstatement to the Project Review Committee for the Design Industry – Architect position. I am currently a Principal at NAC Architecture, a nationally recognized design firm with offices in Spokane, Seattle, Los Angeles, and Columbus, OH. I have been a licensed architect in Washington since 1992.

Serving on the PRC for the past six years has been extremely satisfying, both personally and professionally. The knowledge I have gained from the many different experiences of my fellow committee members has been invaluable. The wide range of construction projects that come before the PRC has given me an immense appreciation for the many different perspectives critical to the success of alternative delivery methods throughout the state of Washington.

Recently, I had the opportunity to serve on the Project Feedback Process Workgroup, a subcommittee of CPARB and the PRC. I'm proud to say this group's work resulted in something tangible with the establishment of a process through which an interested party could open a conversation regarding a project that might not have been as appropriate and successful as it could have been. At the very least, this process will give CPARB and the PRC a window into the alternative delivery world after project approval that otherwise may have remained silent.

With nearly two dozen Design-Build and GC/CM projects in Washington State on my resume, I believe I have the experience and qualifications necessary to continue on the PRC. I would be honored to have the opportunity to again represent the architectural community and its vested interest in alternative delivery.

I have included three references with contact information below. Thank you very much for your consideration and I look forward to serving another term on the PRC. If you have any further questions or would like additional information, please email me at tgolden@nacarchitecture.com or call me at 509.623.2353.

Sincerely,

Thomas E. Golden, AIA, LEED AP
Principal Architect
