Subject: Project Review Committee (PRC) as the Owner Public Hospitals representative

Dear Members of CPARB,

I'm submitting my letter of interest to fill the open Owner Public Hospital Representative position on the Project Review Committee. As a Current member of CPARB representing Public Hospital Districts, I understand the important role PRC plays in reviewing and approving applications by public owners to use RCW39.10 alternative delivery methods whether that being on a project-specific application or for certification. I know the impact an owner's readiness has on the success of the projects they manage as well as on the law that grants its use of alternative methods. I have spent 20 years in public works positions and have managed and directed alternative work projects in the form of GCCM and progressive design-build. I am currently the president of the Western Washington chapter of Design Build Institute of America and have a vested interest in the success of alternative delivery method projects throughout the state. I understand the opportunities that these methods provide as well as their limitations.

Sincerely,

Garett Buckingham
