

Please see questions from the PRC Panel providing the review of the Richland Fire Station project.

In the Richland D-B Fire Station application it shows Matthew Walker as the Project Manager (Consultant with Hill) 100% FTE during the procurement and design phase. In the Spokane Convention Center project previously approved by the PRC, he was presented to be 50% FTE until 12/30/2014. An explanation is probably in order.

Clarify please that the application is requested under RCW 39.10. 300 (5)
